CONTENT OF THE ATLAS

WORLD ARCTIC

18-19  The World Arctic
20-21  The World Arctic. General geographic map 1:15 000 000
22-23  The Arctic. A view from space
24-25  A political map of the Arctic 1:20 000 000
26-27  Geological map Arctic 1:15 000 000
28-29  Climate map of the Arctic 1:20 000 000
30-31  Glaciation and permafrost of the Arctic 1:20 000 000
32-33  The Arctic Ocean 1:20 000 000

GENERAL CHARACTERISTICS OF THE ARCTIC AREA OF THE RUSSIAN FEDERATION

34-35  Arctic area of the Russian Federation. General geographic map 1:12 000 000
36-37  Borders of the Arctic area of the Russian Federation 1:15 000 000
38-39  Physiogeographic zoning of the Russian Arctic 1:16 000 000
40-41  Types and levels of economic development of the Arctic area of the Russian Federation 1:12 000 000

THE FEDERAL SUBJECTS INCLUDED IN THE RUSSIAN ARCTIC

42-43  Subjects of the Russian Federation in the Arctic Area
44-45  Administrative-territorial division of the Arctic Area of the Russian Federation 1:32 000 000
46-47  Murmansk region 1: 2 500 000
48-49  Murmansk region. Kola Peninsula 1: 1 400 000
50-51  The Arkhangelsk Region 1: 8 000 000
52-53  Arkhangelsk Region. White Sea 1: 1 500 000
54-55  Arkhangelsk Region. Novaya Zemlya 1: 1 500 000
56  Franz Josef Land 1: 1 500 000
57  Novaya Zemlya. Space image
58-59  Nenets Autonomous Area 1: 4 000 000
60-61  Republic of Komi 1: 4 000 000
62-63  The Nenets Autonomous Area. Urban district "Vorkuta" (the Republic of Komi) 1: 2 000 000
64-65  Yamalo-Nenets Autonomous Area 1: 7,000,000
66-67  Yamalo-Nenets Autonomous Area. The Yamal Peninsula 1: 1 500 000
68-69  The Yamalo-Nenets Autonomous Area. Salekhard. NovyUrengoy 1: 1 500 000
70-71  Krasnoyarsk Territory 1: 9 000 000
72-73  Arctic districts of the Krasnoyarsk Territory. Turukhansk district 1: 5 000 000, 1: 4 500 000
74-75  Krasnoyarsk Territory. The Taimyr Peninsula 1: 2 500 000

3. RELIEF

| 136-137 | Relief | 1:16 000 000 |
| 138     | Hypsometry | 1:16 000 000 |
| 139     | Orography  | 1:16 000 000 |
| 140-141 | Morphostructure of the land | 1:16 000 000 |
| 142-143 | Morphoscultures of the land | 1:16 000 000 |
| 144-145 | Morphostructure of the ocean floor and the seas | 1:16 000 000 |
| 146-147 | Morphoscultures of the ocean floor and the seas | 1:16 000 000 |
| 148-151 | Modern dangerous geological and geomorphological processes on the territory of the Russian Arctic | 1:12 000 000 |

4. SUBSOIL RESOURCES

| 154-155 | Subsoil resources | 1:12 000 000 |
| 156-159 | Petroleum potential of the continental part of the Russian Arctic and the shelf | 1:12 000 000 |
| 160-161 | Areas of gas hydrate content | 1:16 000 000 |
| 162-163 | Metallogenic areas and belts, ore occurrences | 1:16 000 000 |
| 164-165 | Mineral resources. Deposits of minerals | 1:16 000 000 |

5. EVOLUTION OF THE NATURAL ENVIRONMENT

| 168     | Dynamics of the formation of Arctic ecosystems within the Russian Arctic | 1:25 000 000 |
| 169     | Optimum of the Mikulino interglacial about 125 thousand years ago | 1:25 000 000 |
| 170.    | Maximum cooling of the last glacial epoch, 20–18 thousand years ago | 1:25 000 000 |
| 171     | Dynamics of the ecotone of taiga and tundra in Late Glacial and Holocene | 1:25 000 000 |
| 172     | Optimum Holocene, 6-5 thousand years ago | 1:25 000 000 |
| 173     | Stages of the initial development of the Arctic by man. Late Paleolithic, Mesolithic, Early Neolithic | 1:25 000 000 |
| 174     | Reconstruction of conditions of human settlement during the warming epoch (megainterstadial), 40–25 thousand years ago | 1:25 000 000 |
| 175     | Reconstruction of conditions human settlement in the era of maximum cooling (Pleistocene), 20–18 thousand years ago | 1:25 000 000 |
| 176     | Reconstruction of conditions of human settlement in the late glacial, 15–11 thousand years ago | 1:25 000 000 |
| 177     | Reconstruction of conditions of human settlement in the early Holocene, 10–5 thousand years ago | 1:25 000 000 |
6. CLIMATE

180-181 Climate
182-183 Climatic areas and areas
184-185 Climate-forming factors
186-187 Network of terrestrial meteorological stations. Satellite system of meteorological support of the Russian Arctic
188 Duration of sunshine (year)
189 Total solar radiation (year)
189 Total solar radiation (January)
189 Total solar radiation (July)
190 Radiation balance (year)
191 Radiation balance (January)
191 Radiation balance (April)
191 Radiation balance (July)
191 Radiation balance (October)
192 Average annual air temperature
193 Average monthly temperature (January)
193 Average monthly temperature (April)
193 Average monthly temperature (July)
193 Average monthly temperature (October)
194-195 Average annual wind speed
196 Annual rainfall
197 Monthly precipitation (January)
197 Monthly precipitation (July)
197 Monthly precipitation (October)
198 Frequency of snowfalls of different intensity
199 Average number of days with fogs (year)
199 Average number of days with snowstorms (year)

Duration, time of beginning and end of a stable cold and warm period

7. OCEAN, THE SEA

202-203 Ocean, the sea
204 The Barents Sea
205 The White Sea
206 Kara Sea
207 The Laptev Sea
208 East-Siberian Sea
209 The Chukchi Sea and the northern part of the Bering Sea
210 Water surface temperature (winter)
210 Water surface temperature (summer)
211 Water temperature at depths (100 m)
211 Water temperature at depths (300 m)
212 Water salinity on the surface (winter)
212 Water salinity on the surface (summer)
213 Water salinity at depths (100 m)
213 Water salinity at depths (300 m)
8. COASTS OF THE SEA

222-223  Coasts of the sea
224  Morphogenetic map of the coasts of the Barents Sea 1: 8 000 000
225  Morphodynamic map of the coasts of the Barents Sea 1: 8 000 000
226  Morphogenetic map of the coasts of the White Sea 1: 2 000 000
227  Morphodynamic map of the coasts of the White Sea 1: 2 000 000
228  Morphogenetic map of the coasts of the Kara Sea 1: 8 000 000
229  Morphodinamic map of the coasts of the Kara Sea 1: 8 000 000
230  Morphogenetic map of the Laptev Sea coast 1: 8 000 000
231  Morphodynamic map of the Laptev Sea coast 1: 8 000 000
232  Morphogenetic map of the coasts of the East Siberian Sea 1: 8 000 000
233  Morphodinamic map of the coasts Chukchi Sea and the northern part of the Bering Sea 1: 8 000 000
234  Morphogenetic map of the coasts Chukchi Sea and the northern part of the Bering Sea 1: 8 000 000
235  Morphodynamic map of the coasts of the Chukchi Sea and the northern part of the Bering Sea 1: 8 000 000
236-237  Dangerous coastal processes 1:16 000 000

9. SNOW COVER. GLACIERS. PERMAFROST

240-241  Snow cover. Glaciers. Permafrost
242  Number of days with snow cover 1: 25 000 000
   Height of snow cover 1: 25 000 000
   The number of days with a snow height of more than 50 cm 1: 25 000 000
   Maximum snow reserves 1: 25 000 000
   Changes in the timing of destruction of a stable snow cover in the era of modern global warming 1: 25 000 000
245  Rating the territory of the Russian Arctic by avalanche danger
   Glaciers 1: 25 000 000
246  Modern glacial cover and glaciers 1: 25 000 000
247  Changes in glaciers in the twentieth century 1: 25 000 000
248-249  Types of glaciers and their characteristics
   Movement of glaciers and chipping of icebergs, ways to move them
248  New Earth. Modern glaciation 1: 4 000 000
   Franz Josef Land. Modern glaciation 1: 6 000 000
GEOGRAPHY

249 New Earth. Modern glaciation 1:7 500 000
Icebergs in the Barents Sea (April–May) 1:16 000 000
Icebergs in the Barents Sea (September) 1:16 000 000

250-253 Types of glaciers and their characteristics

250 The Polar Urals. Modern glaciation 1:2 500 000
Mount Putoran. Modern glaciation 1:7 500 000

251 The Mountains of Burrang. Modern glaciation 1:7 500 000
Ourlan Range. Modern glaciation 1:2 250 000

252 The Chersky Range. Modern glaciation 1:7 500 000
Mountains Suntar-Hayat. Modern glaciation 1:7 500 000

253 The Kolyma Highlands. Modern glaciation 1:7 500 000
Chukchi Highlands. Modern glaciation 1:7 500 000
Koryak Highlands. Modern glaciation 1:7 500 000

254-255 Distribution and ice content of permafrost Power of permafrost 1:16 000 000

256-257 Temperatures of permafrost. Exogenous processes in cryolithoarea 1:16 000 000

258 Rating of cryolithoarea in terms of management 1:25 000 000

259 Change of permafrost conditions in the XX century
and trends of change permafrost conditions in the 21st century 1:25 000 000

10. LAND WATERS

262-263 Land Waters

264 Hydrographic network 1:16 000 000

265 Watershed pools 1:16 000 000

266 The density of the river network 1:25 000 000
Types of water regime of rivers 1:25 000 000

267 Annual runoff of rivers 1:40 000 000
The surface component of the annual runoff 1:40 000 000
Rationing on the genesis of floods 1:40 000 000
Repeatability of dangerous floods and floods. 1:40 000 000
Melt flow fraction (year) 1:40 000 000
The period when the ice got up on the rivers 1:40 000 000
Opening of rivers. The period without ice 1:40 000 000

269 Dangerous hydrological phenomena 1:25 000 000

270 Use of water resources 1:40 000 000
Extraction and extraction of groundwater 1:40 000 000

11. SOIL COVER

274-275 Soil cover. Structure of the soil cover 1:25 000 000

276-277 Soils 1:12 000 000

278-279 Heat regime of soils 1:40 000 000
Water regime of soils 1:40 000 000
Frozen 1:25 000 000

280-281 Geochemical barriers
Soil resistance to oil and oil products pollution 1:40 000 000
Reserves of organic carbon in soils and peat 1:40 000 000
CO2 emissions from soils 1:25 000 000

282-285 Soil and ecological zoning 1:12 000 000
## 12. PLANT AND ANIMAL WORLD

### 288-289 Plants and Animals

#### VEGETATION

- **290-293** Vegetation 1:12 000 000
- **292** Areas and types of vegetation 1:25 000 000
- **293** Biome 1:25 000 000
- **294-295** The species diversity of vascular plants 1:40 000 000
  - Species variety of bryophytes 1:40 000 000
  - Species variety of lichens 1:40 000 000
- **296-297** Geobotanical zoning 1:25 000 000

#### ANIMAL WORLD

- **298-299** Zoogeographical zoning 1:25 000 000
  - Modern trends in the dynamics of animal numbers 1:25 000 000
- **300** Distribution of background arctic mammals 1:40 000 000
  - Arctic fox 1:40 000 000
  - Distribution of animals with different landscape-zonal distribution. Lemmings 1:40 000 000
- **301** Arctomontane connections of animals - disjunctive areals and areals of close species 1:40 000 000
  - Areas of the Beringian, North Atlantic and amphipalearctic species 1:40 000 000
- **302** Distribution of key species of marine mammals 1:40 000 000
  - Accumulations of animals 1:40 000 000
  - Marine commercial fish species 1:40 000 000
- **303** Areas of key species of arctic bird fauna
  - The location of large colonies and bazaars 1:40 000 000
  - Key places for stopping migratory bird species, the most important migration routes 1:40 000 000
  - Nesting areas of large species of Arctic birds 1:40 000 000
  - Birds are relics of the Tertiary period 1:40 000 000
- **304** Restinal rivers and salmon populations 1:40 000 000
  - Distribution of key species of ichthyofauna 1:40 000 000
- **305** Distribution of key marine species of invertebrate animals 1:40 000 000
  - Distribution of amphibians and reptiles 1:40 000 000
- **306-307** Types of hunting grounds 1:16 000 000

### 13. STATE OF THE ENVIRONMENT AND NATURE CONSERVATION

- **310-311** State of the environment and nature conservation
- **312-315** Landscape structure of the territory of the Russian Arctic 1:12 000 000
- **316-317** Landscape geochemical map 1:16 000 000
- **318** Sources of human impacts. Dangerous phenomena, related to anthropogenic activities 1:25 000 000
- **319** The impact of oil, gas and mineral extraction on the environment 1:25 000 000
- **320** Levels and trends of pollution of the natural environment
  - Atmospheric transfers and deposition of pollutants 1:40 000 000
321 Levels of pollutants in the atmosphere of cities 1:40 000 000
Hydrocarbons in the environment 1:40 000 000
Heavy metals in soils 1:40 000 000
Pollution of bottom sediments of the Barents Sea 1:12 000 000
322 System of observations of marine pollution 1:40 000 000
Sources of radioactive contamination of the Arctic seas 1:40 000 000
Radioactive pollution of the Barents Sea 1:16 000 000
Radioactive pollution of the Kara Sea 1:16 000 000
Protection of Nature 1:16 000 000
323 Disappearing plant species 1:40 000 000
Disappearing species of animals 1:40 000 000
324 A rare species of vascular plants 1:25 000 000
325 Early species of birds 1:25 000 000
Rare species of mammals 1:40 000 000
Regional Red Book of plants and animals 1:40 000 000
326 Disappearing species of animals 1:25 000 000
327 System of observations of marine pollution 1:40 000 000
328 The current and prospective network of specially protected natural territories 1:25 000 000
329 Protection of the bioresources of the seas 1:25 000 000
330 Complex of measures for nature protection 1:16 000 000
331 POPULATION. CULTURE
332 Population. Culture
333 Racing of the territory of the Russian Arctic on the degree of auspiciousness of natural conditions for the life of the population 1: 25 000 000
334 Modern structure of settlement 1: 25 000 000
335 Dynamics and population of districts and settlements 1: 25 000 000
336 The ethnic composition of the population: dynamics, structure, demographic forecast 1: 25 000 000
337 Indigenous and small peoples 1: 25 000 000
338 Demographic potential 1:40 000 000
339 Modern demographic processes and migration 1:40 000 000
340 Natural movement of the population Religious and confessional structure of the population 1:40 000 000
341 Medical and health institutions Provision of the population with medical services 1:40 000 000
Institutions of culture. Development of national cultures peoples of the North of Russia 1:40 000 000
342 Network of educational institutions in the territory subjects of the Russian Arctic 1:40 000 000
Dynamics of the general educational level of the population the Russian Arctic 1:40 000 000
343 Development of tourist routes in national parks and nature reserves of the region 1:40 000 000
Organization of observation of animals in places their natural habitat (safari) 1:40 000 000
Organization of ethno-cultural tourism 1:40 000 000
344 Organization of various types of hunting and fishing 1:40 000 000
Organization of pilgrimage routes 1:40 000 000
Event tourism (taking into account the calendar of significant dates and national holidays) 1:40 000 000
345
15. CULTURAL, SPIRITUAL AND NATURAL HERITAGE

350-351 Cultural, spiritual and natural heritage
352-353 The Kola Peninsula. White Sea
354-355 The Solovetsky Islands
356-357 The Nenets Autonomous Area City district “Vorkuta” (the Republic of Komi)
358-359 The Land of Franz Josef
360-363 New Land
364-365 The island of Vaigach
366-367 The Yamalo-Nenets Autonomous District
368-370 The North of the Krasnoyarsk Territory. The Taimyr Peninsula
371 The island of the Kara Sea. Northern Earth
372-373 The northern part of the Republic of Sakha (Yakutia) The Novosibirsk Islands
374-377 Chukotsky Autonomous District
377 The Wrangel Island

16. ECONOMY

380-381 Economy
382-383 Production structure
384 Agriculture
385 Traditional use of indigenous peoples
386-387 Oil and Gas Industry
388-389 Pipeline
390-391 Mining and processing industry
392 Land transport
393 Aviation transport
394-397 Sea and river transport. The Northern Sea Route
398 The northern delivery. Import of products
399 Evolution and current state of the river transport systems
400 The Northern Sea Route. Space photo
401 Communication and infrastructure
Coverage of public communication systems
Tertiary sector of the economy. Development of a network of institutions social services for the population

17. LAND USE

404-405 Land use
406-407 Distribution of land by land categories
408-409 Distribution of land by land
410 Using land by producers agricultural products
411 Lands disturbed by mining operations
18. STRATEGIC PLANNING

414-415 Strategic Planning
416-417 Governments of state power State management of the development of the Russian Arctic. Scientific and information support government controlled 1:16 000 000
418-419 Monitoring sections of socio-economic programs development of the subjects of the Russian Arctic 1:25 000 000
420 Climatic changes Change in the average annual value of air temperature 1:40 000 000
Change in the average annual temperature value surface of the ocean 1:40 000 000
Change in the average annual value of the total amount precipitation 1:40 000 000
Change in annual average concentration value sea ice 1:40 000 000
421 Rating by natural conditions life of the population for the middle of the XXI century Forecast of social and economic development 1:25 000 000

19. ECOLOGICAL SAFETY. NATURAL AND TECHNOGENIC CAUSE RISKS

424-425 Ecological safety. Natural and Technogenic cause risks
426-427 Zoning of the territory of the Russian Arctic by environmental sustainability of the natural and economic environment 1:16 000 000
428-429 Natural hazards and risks in the territory the Russian Arctic 1:16 000 000
430-431 Human-caused hazards and risks in the territory the Russian Arctic 1:16 000 000
432 Sources of pollution outside the Russian Arctic Accumulated environmental damage 1:40 000 000
433 Ecological rehabilitation of territories prone to negative impact of objects accumulated environmental damage 1:25 000 000
434 Maintenance of main monitoring networks ecological situation 1:25 000 000
435 Provision of Ecological Safety of the Population on the territory of Russian Arctic 1:25 000 000

20. RUSSIAN ARCTIC AREAS THAT HAVE A HIGH ANTHROPOGENIC IMPACT

438-439 Impact regions of the Arctic area of the Russian Federation
440-441 Impact regions of the Arctic area of the Russian Federation and sources of anthropogenic impact on the natural environment 1:12 000 000
442-443 Western Kola Impact Area of the Arctic Area (Murmansk region–Nickel, Zapolyarnyi) Mining, industrial and energy infrastructure 1:500 000
Social infrastructure. Zoning by conditions life of the population 1:1 000 000
Infringements and pollution of components of an environment. Natural and Human-caused risks 1:1 000 000
444-446 TheNizhne-Obsky Impact Area of the Arctic Area (Yamal-Nenets Autonomous District) Mining, industrial and energy infrastructure 1:3 000 000
445 Mining, industrial and energy infrastructure 1:6 000 000
Infringements and pollution of components of an environment. Natural and Human-caused risks 1:6 000 000
Social infrastructure. Zoning by conditions life of the population 1:6 000 000
The Norilsk Impact Area of the Arctic Area (Krasnoyarsk Territory–Norilsk Industrial District) 1:1 000 000
Mining, industrial and energy infrastructure 1:2 000 000
Infringements and pollution of components of an environment. Natural and Human-caused risks 1:2 000 000
Social infrastructure. Zoning by conditions life of the population 1:2 000 000

21. ARCTIC EXPLORATION BY SPACE-BASED TECHNIQUES

450-451 Research of the Arctic by space techniques
452 Covering the Russian Arctic with Russian space materials shooting from satellites of the Resurs-F series (1974–1999) 1:25 000 000
453 Modern shooting of the territory of the Russian Arctic by domestic and foreign space vehicles 1:25 000 000
454-455 Results of special processing of space images in the areas of complex space monitoring of the Russian Arctic
456 Complex space monitoring of the territory of the Russian Arctic by domestic means of sounding.
Space system “Arctic-M”
457 The Russian ‘United territorially-distributed information system of remote sensing of the Earth’ 1:30 000 000
458-459 Natural-economic zoning of the Russian Arctic with the use of space imagery in the interests of organizing integrated monitoring.
Morpho-structure of the relief 1:16 000 000
Bioclimatic belts 1:50 000 000
Nature of economic development 1:50 000 000
460-461 Creation of modern ortho maps and high-resolution orthophoto of space images in the interests of development of territories and water areas of the Russian Arctic

22. ARCTIC AS AN AREA OF INTERNATIONAL COOPERATION

464-465 Arctic is an area of international cooperation
466-469 Definition of exclusive economic areas and continental shelf of the Arctic 1:15 000 000
470-471 Arctic as a space for international cooperation 1:120 000 000
472-481 Index of geographical names
482-491 Glossary of terms
492-495 Used Sources
